SUMMARY

Results-Oriented Front-end Developer with **2+ years of practical experience** and a strong foundation in modern web architecture. Hands-on experience with the latest stack: **React (v19)**, **Next.js (v15)**, and **Tailwind v4**, focused on delivering high-quality, performant solutions. Holds practical experience in **SSR** implementation, **performance optimization** (with proven results up to PageSpeed 100), and is active in team **Code Review** processes. Eager to leverage this experience to quickly scale skills and contribute effectively within a **structured, mentorship-driven environment**.

TECHNOLOGIES

- HTML5, CSS3, JS(ES6+)
- TypeScript
- TailwindCSS
- ReactJS
- Nextjs
- Redux Toolkit/RTK Query
- Jest / React Testing Library
- ESLint & Prettier
- Git / pnpm / Husky

SKILLS

- Agile Methodology
- Jira
- Small Team Leadership
- Cross-functional Collaboration
- Effective Code Review
- Web Accessibility
- Performance Optimization

WORK EXPERIENCE

LLC WAA | 09.2024 - 02.2025
Front-end Engineer

- Independently developed and maintained the admin panel using React and Redux Toolkit to centralize all game PoC data, including user achievements, error logs, and personalized feedback.
- Engineered dynamic data visualization using a customized ShadCN UI library, enabling internal stakeholders to track essential metrics for product decision-making.
- Ensured the scalability of the data reporting system by implementing Redux Toolkit for robust state management, which provided seamless integration points for future features (e.g., admin bonus system).
- Managed the end-to-end integration between the admin UI and the backend API, operating as the sole Front-end developer responsible for the entire administration interface.

Elit-taxi | 06.2023 – 07.2024
Frontend Developer

- Led the implementation of the website modernizatio and rebranding of the legacy multi-page website into a modern, SPA-like experience with a focus on speed and user engagement.
- Developed a high-speed, adaptive order form with direct API integration to the backend system.
- Result: Enhanced client engagement, increasing the average session duration by 30% and drastically streamlining the user's taxi ordering process.
- Designed and implemented a secure B2B monitoring cabinet for taxi fleet owners, featuring a real-time driver geolocation and status UI.
- Result: Increased operational efficiency for B2B clients by reducing the time spent on manual driver control by 60% (transitioning from physical checks to online monitoring), receiving high user satisfaction.
- Functioned as the sole Front-end specialist, owning the entire UI/UX lifecycle, E2E integration, and ensuring high technical reliability of the critical service.

PORTFOLIO

TikTok-style Mobile Video App | 2025   ~~Demo App~~   ~~Github URL~~
Mobile Developer
- Engineered a cross-platform **mobile application** with a vertical video feed, enabling smooth playback, uploads, and user interaction across **iOS** and **Android**.
- Implemented **end-to-end user features** – authentication, profiles, likes, comments – ensuring predictable workflows and secure access.
- Designed and integrated a scalable backend using a modern BaaS stack(**supabase**): efficient media storage/streaming and structured data models for posts, interactions, and user accounts.
- Applied **React Native** with **Expo**, predictable state management(**Zustand**), and optimized data fetching(**TanStack Query**) to deliver a clean architecture and responsive mobile UX.

Self-Employed | 04.2025 - 09.2025   ~~Live DEMO~~   ~~Github URL~~
Fullstack Developer
- Achieved a PageSpeed score of 94 (mobile) and 100 (desktop) by deploying a hybrid SSR-client architecture on Next.js v15.5.3 and integrating RTK Query to optimize initial data loading.
- Contributed to code quality by adhering to strict coding standards and systematic code review processes (including PR mentoring) for a 3-person team, significantly boosting overall code quality and reducing the average merge time to under 10 minutes.
- Fully engineered the SEO infrastructure, dynamically generating OpenGraph and metadata for product pages, which ensured high click-through rates (CTR) and enhanced organic search visibility.

Real-Time Messenger | 2023   ~~Live DEMO~~   ~~Github URL~~
Front-end Developer
- Developed a scalable SPA messenger supporting private and group chats using Pusher for real-time bi-directional data flow and NextAuth for secure E2E user authentication.
- Demonstrated Full-Stack proficiency by utilizing Prisma as the ORM for robust data persistence and Next.js API Routes for secure server-side logic.

E-commerce Ecosystem | 2023   ~~Live DEMO: Store~~   ~~Github URL~~
Front-end Developer   ~~Live DEMO: CMS~~   ~~Github URL~~
- Engineered a full-featured E-commerce Store with a dedicated Dashboard/CMS for creating and managing product inventory, categories, and order statistics.
- Leveraged Prisma, Clerk and Shadcn/UI to build a professional, secure, and easily maintainable commercial application.

EDUCATION

National Academy of Management | 2009-2013
System Analysis, Bachelor's Degree

PCIST KNEU | 2004-2009
Software Development, Secondary Special Education
